Monday Clinical Papers

Welcome from the President

The Bain Fallon memorial lectures are back at last. In spite of the efforts of many to make it a reality these last 2 years, this world class conference has been twice cancelled, a legacy of the covid pandemic. We are celebrating fifty years of Bain Fallon one year late, but better late than never, and this milestone is an outstanding achievement for our organisation. On behalf of EVA, I extend to you all a very warm welcome, and congratulations on making it here to Boonwurrung country.

The EVA Education Committee has prepared an exceptional program featuring an all-Australian cast of truly outstanding high calibre speakers. Our keynote speakers will be presenting on Reproduction and Upper Respiratory, backed up by an amazing array of other talented domestic speakers covering topics such as diagnostic imaging, lameness and infectious disease. There will be the inaugural Prof. Hutchins Newshour, advocacy session and the wealth and wellness hour - there is something for everyone. We will once again present an outstanding session on the clinical and research papers, as well as the very popular poster competition. Our Pascoe oration will be

presented very appropriately for our 50-year celebrations by long standing EVA member Dr David Johnson.

The industry exhibition after a two-year long hiatus is back bigger and better than ever and our industry partners can't wait to interact with our delegates face to face.

Covid 19 has been hard on many of us, but hopefully we are nearing the end of the pandemic. We understand how challenging the last 30 odd months have been and we can't wait to see you all for outstanding CPD, amazing collegiality and a catch up with old and new friends. It is time for us all to be together again, and we can't wait to see you all!

I wish to pay tribute to the EVA organising committee, the AVA events team, our Australian speakers, delegates, sponsors and exhibitors. Without them it would not be possible to hold Bain Fallon. We are looking forward to a week of shared learning, amazing collegiality, and lots of laughs. I look forward to catching up with all of you during the week!

Dr Steve Dennis

With thanks from the Education Chair

Welcome to Melbourne for the 42nd Bain Fallon Memorial Lectures! We are so pleased to be back in person and are looking forward to connecting with you all. This week is packed with educational opportunities along with the great social program that Bain Fallon is famous for. The "upper respiratory and reproduction" themed presentations delivered by our key notes are complemented by a fantastic range of presentations from our other speakers. In addition, the very popular clinical abstracts session, the focus on, wealth and wellness, how-to and twilight tutorial sessions make for a great program. The week will start out with the nerve block and joint injection workshop, involving an array of local expertise. Our keynote speakers are internationally renowned in their respective fields and we are grateful to Drs. Chelsie Burden, Angus McKinnon and Brian Anderson for coming to Melbourne to present to you. The week is sure to have something that will appeal to everyone. Thank-you to the education committee, the executive, and last but certainly not least Jeffrey, Victoria and Camilla who do all the behind the scenes work to present you with, what we consider to be, the best week of equine CE event in the country!

Dr Laura Hardefeldt

BSc BVMS MPH PhD Diplomate ACVIM

About the Bain Fallon Memorial Lectures

The Bain Fallon Memorial Lectures continue to be the biggest week of equine veterinary continuing education in the Southern Hemisphere, attracting over 200 delegates each year.

Featuring concurrent streams of practical clinical sessions, the Bain Fallon Memorial Lectures offer delegates the opportunity to participate in world-class lectures and thought-provoking discussions. The event features an industry exhibition comprising of over 50 exhibitors. It continues to be a sell-out trade show year-upon-year, in addition to offering popular practical workshops. The social events are a highlight of the conference, and provide perfect networking opportunities with peers, suppliers and fellow industry professionals.

At Bain Fallon in 2022 we will showcase the very best of Australia's equine veterinary researchers and scientists with a program befitting our proud 50-year history. In response to growing demand, Bain Fallon will feature two streams of lectures on Tuesday and Wednesday afternoons. In addition, each day will be allocated to one of the three themes with in-depth and clinically relevant lectures presented for equine practitioners in all stages of their careers from new graduates to highly experienced veterinarians. Our world-class speakers will deliver lectures on popular topics such as reproduction, upper respiratory as well as fungal and bacterial diseases of horses. Popular "How-I" sessions are spread throughout the program, as are presentations bringing the most relevant Australian research to the clinician.

About Equine Veterinarians Australia

Equine Veterinarians Australia (EVA) is a special interest group of the Australian Veterinary Association (AVA) and the premier provider of continuing professional development for equine veterinarians in Australia.

EVA maintains strong links with both equine organisations and horse owners. An important role for EVA is providing advice and information to the people who care for horses to ensure that Australian horses enjoy the best possible health and welfare. With an emphasis on providing the support members need to remain at the forefront of equine veterinary medicine, EVA also represents the interests of members to governments and equine industry groups. You must be a member of the AVA to join, and you can add EVA to your membership online. You can contact EVA on 02 9431 5080 or at elaine.robertson@ava.com.au.

For more information, or to become a member of EVA, visit www.ava.com.au/member-services/my-ava-groups/equine/

Equine Veterinarians Australia - 50 Years Young

Founded in 1971 by a group of visionary equine veterinarians. These veterinarians could see that the future prosperity of the profession would have a foundation in continuing professional development and education. Thus, EVA was born and 50 years later we look to Bain Fallon 2022, to celebrate half a century of excellence in equine veterinary science and the support of the industry that has supported this incredible journey. We invite you to come to Melbourne in July to celebrate this momentous occasion with us.

Senior Horse Health and Management - *Rachel Tan*

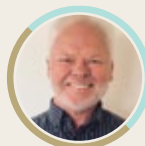

Advances in veterinary medicine have significantly increased the life span of horses. These horses can remain healthy and active by understanding the most prevalent diseases that affect geriatric animals. Effective management and preventative care programs can be designed to successfully manage aged care and maximise quality of life.

AVet Health is a new Australian veterinary pharmaceutical company focused simply on delivering high quality animal health products at great value, exclusively through veterinary clinics. The single-minded purpose of AVet is to help veterinarians achieve even greater success in practice. AVet partners closely with its customers to enhance the total health of their practices: from patient health outcomes to supporting their financial health. Having successfully launched Wagg & Purr, a private label for companion animal veterinarians, AVet is now expanding into other species segments and is particularly passionate about the equine industry and the incredible equine vets that serve it with such distinction. AVet is in the process of pulling together a great team and launch product portfolio to set it on the path to achieve its goal of becoming the most respected veterinary pharmaceutical company by equine vets. We welcome you to visit our stand as we seek to listen and understand how we can become a great partner to the equine industry.

Mr Chris Graham

chris@bcfultrasound.com

03 9874 7543

www.bcfultrasound.com

At BCF Ultrasound, we want our customers to get the most out of their ultrasound machine. We pride ourselves on being one of the leading providers of portable ultrasound equipment and accessories for the veterinary market.

Versatile solutions in veterinary imaging

We understand that quality patient care is of paramount importance and our versatile and durable ultrasound solutions allow our customers to find the best options suited to their individual needs – based on application and budget.

Customer care and education

As part of our ongoing commitment to our customers, we develop and support ultrasound training workshops, provide installation training and develop education materials online. When you buy an ultrasound machine with us, you can be guaranteed that you will receive the support you need to get the best out of it.

World-class service

At BCF Ultrasound, we understand that any potential downtime with your ultrasound or equipment is less than ideal. With service centres in both Australia and New Zealand, our highly-trained technicians are here to ensure that all repairs are handled efficiently.

<https://bovavet.com.au/>

At Bova Aus our commitment to quality is of the highest standard and we guarantee four aspects of quality: quality ingredients, quality products, quality assurance, and quality service. Our world-class facility comprises over 120 employees nationally, 190 globally, and our laboratories house state-of-the-art equipment that includes both sterile and cytotoxic suites. All of which are placed under stringent quality assurance. Alongside our tailor-made prescriptions, we provide a range of quality assured products that are end product tested and undergo stability trials so that veterinarians can have confidence in the medication they are prescribing. We understand that the quality of a compounded medication is key to a successful clinical outcome and our commitment to quality means that with Bova Aus veterinarians can have the confidence that they will receive the highest quality medications available to improve the clinical outcome for all their patients.

1953 Grampian's Road, Fyans Creek, Victoria 3381

Dr Edwina Lamkin

sales@imsvet.com

0408 899 940

www.imsvet.com

IMS Vet Pty Ltd are privileged to have registered ARTHRAMID® VET and hold exclusive veterinary market authorisations for New Zealand and Australia.

Arthramid® Vet is a unique hydrogel formulation of 2.5% cross-linked polyacrylamide in a sterile pre-filled 1mL syringe for intra-articular injection to treat non-infectious joint lameness in animals.

Arthramid® Vet has the ability to integrate into the synovial membrane to create a safe and inert "bio-scaffold" supporting structure. This unique action helps stabilise the joint capsule, increase elasticity, and reduce the pain of synovitis and osteoarthritis, promoting restoration of normal joint function.

IMS Vet is positioned as a key leader in researching, developing and promoting innovative products for the veterinary market created around a small but dedicated team of passionate people. We focus on the best veterinary technologies from around the world for veterinarians in Australia, New Zealand, Hong Kong, Singapore, Japan and the Middle East.

www.iahp.com.au

International Animal Health Products manufactures and markets quality Australian owned and Australian made products. We have a range of solutions for cattle, horses, sheep, goat, pigs and poultry. International Animal Health Products began operations in 1987 and since that time we have been successful in incorporating several existing product lines into IAHP which has led to a diverse product range. This product range includes many well-known brands such as Livamol, BioWorma, Farnam, ProN8ure, Ausmectin and our Vet Only range. Our aim is to provide solutions to improve the overall growth, health and well-being of your animals and birds. Our innovative research-based solutions include feed additives, medications, probiotics, nutritionals, first aid, biological and worming products while servicing the needs of veterinarians, farmers and owners of livestock.

Interpath

Stand 47, 48, 49, 50

Interpath Global is a pioneering Australian health company specializing in the research and development of natural, scientifically proven products with a focus on joint care.

EPIITALIS®, Interpath's exclusive and patented active, is a sustainable plant seed oil extract and is a true game-changer within the joint health industry.

Interpath's products, including 4CYTE Granules & EPIITALIS® Forte Gel, OSTEO-Restore and Sashas, represent a breakthrough in the prevention and treatment of joint injury and degenerative joint diseases such as osteoarthritis, in both people and animals.

0419 638 984

www.jenquine.com

After obtaining a veterinary degree & PhD, Dr Jen Stewart spent 40 years in equine practice, including 10 years as the equine nutritionist with Mitavite. During this time, Jen started developing premium formulas for studs, trainers & feed companies in Australia & around the world. She regularly consults to leading international studs & trainers in New Zealand, Australia, South Africa, Japan & India. Jen has spent a fair bit of time researching & being involved in nutritional management of developmental orthopaedic diseases, colic, tying-up, laminitis, performance problems, post-surgery & other conditions. Combining all of Jen's experience & wanting to bring science to your feed bin Jenquine was created, where the best evidence-based nutrition supported by veterinary & scientific research is provided. Jenquine is at the cutting edge & provides quality ethical products which have been tested with extensive clinical field trials by veterinarians & horses owners. Our products are formulated & produced in Australia in APVMA licensed & ISO accredited facilities. Jenquine also offer veterinary clinical diet-analysis, support & seminars to equine practitioners & their clients. Our skilled team are passionate about helping horse owners in equine clinical nutrition.

Dr Jennifer Stewart - Australia's only practicing Equine Veterinarian & Clinical Nutritionist A key responsibility for equine veterinarians is education of horse owners, which makes for healthier horses. Dr Stewart makes this easier with Jenquine's formulated range of quality products that have been tried & trusted by many veterinarians. Our promise is to continue to BRING SCIENCE TO YOUR FEED BIN.

www.parasightsystem.com

Parasight System Australia & New Zealand: The Parasight System is an automated, standardized automated fecal egg count (FEC) system with significantly less variability and more accuracy than the traditional McMaster FEC test method. Parasight identifies and counts parasite eggs with a sensitivity of 4 eggs per gram in less than 3 minutes using an automated algorithm and software imaging technology. The Parasight System outputs an auditable image of the parasite eggs and generates a count of the total eggs per gram. The Parasight App provides a simple, user-friendly interface which enables the user to efficiently manage their clients faecal egg count results. Website: www.parasightaustralia.com.au

Plasvacc PTY LTD

Stand 54

Rigby, KALBAR, QLD, 4309, Australia

Ms Madison Eather

meather@plasvacc.com

07 5436 7600

www.plasvacc.com

Plasvacc is an Australian pharmaceutical company founded in 1996. Plasvacc manufactures and distributes high quality hyperimmunised blood plasma products used to supplement the immune response system in animals. Plasma therapy shortens the course of treatments, reduces hospitalisation periods and lessens the quantity of drugs required to treat a variety of medical conditions. We are the only commercial producer of plasma for veterinary use in Australia and our facility, located in South East Queensland, is the only dedicated animal plasma production facility in the country. All Plasvacc products are registered with both the Australian Pesticide and Veterinary Medicines Authority (APVMA) and the New Zealand Food Safety Authority (NZFSA). Plasvacc is also registered with the APVMA as an approved plasma manufacturer. The techniques developed by Plasvacc to manufacture high quality plasma products have been recognised globally, with products currently supplied to over 2000 clients in Australia and overseas.

Provet Pty Ltd

Stand 47, 48, 49, 50

www.provet.com.au

Provet was established by a group of veterinarians who shared a common vision for the veterinary profession, to provide the veterinary industry with a resource to help veterinarians run better businesses and strengthen the profession through reinvesting proceeds into the industry professional bodies. Now 40 years on, the vision continues to be realised. Provet is committed to giving back to the industry to ensure its continued growth.

We are proud of our long association and value our relationships with the veterinary professional bodies through our industry sponsorships including; our Platinum Education Partnership with the AVA and EVA - Bain Fallon Platinum Sponsor, AVA Conference Platinum Sponsor, ASAV Conference Gold Sponsor, VBG Summit Gold Sponsor and numerous other sponsorships and associations.

SilverGlide**Stand 51****15/5 Salisbury Rd, Castle Hill, NSW, 2154****Julia Delany****Julia@silverglide.com.au****1300 365 241****www.silverglide.com.au****WHAT IS SO DIFFERENT ABOUT SILVERGLIDE?**

When we commenced marketing sutures to veterinary practices in 2014, SilverGlide™ entered with an array of sutures that was similar to all the existing suture suppliers. IE. Whatever was being manufactured for human surgery.

Our challenge at that time was to provide hospital grade sutures at affordable prices,

thus improving practice economies. The outcome of this has been that practices using SilverGlide™ have reduced their suture costs by between 25 and 50%, with no compromise on quality.

VETS TALK AND SILVERGLIDE LISTENS....

It was not long before our surgeons were sharing with us frustrations they faced day to day, having to make do with suture offerings that did not adequately address their needs in veterinary surgery.

SILVERGLIDE SUTURE INNOVATIONS....

As a consequence of listening to our veterinary surgeons, SilverGlide™ has made several changes to their original suture offering:

- High visibility skin sutures that contrast vividly against dark skin or hair.
- Short, low cost sutures (SHORTY™) for sewing in cannulas and drains or just to close small wounds economically.
- Replacing suture material in cassettes that can begin to biodegrade prior to use, with pre-cut ligatures in sachets with a 3 year shelf life.
- Custom-designing swaged sutures for equine surgery, as well as for bovine C-sections, using longer, swaged sutures and larger needles.

WHO USES SILVERGLIDE?

The uptake of SilverGlide™ has been rapid, with the majority of practices who trial SilverGlide™ becoming regular users.

Our innovations are now widely used by veterinary surgeons and universities throughout USA, UK, NZ and Europe.

Australian veterinary universities in Queensland, Sydney, Wagga Wagga, Melbourne and Adelaide utilise SilverGlide™ sutures in their routine surgeries, as well as in their student training programmes.

SVS Pathology Network**Stand 30****1 Sabre Cres, Jandakot WA 6164****Deanne Broughton****deanne.broughton@healius.com.au****0407 298 920**
