About Equine Veterinarians Australia

Equine Veterinarians Australia (EVA) is a special interest group of the Australian Veterinary Association (AVA) and the premier provider of continuing professional development for equine veterinarians in Australia. EVA maintains strong links with both equine organisations and horse owners. An important role for EVA is providing advice and information to the people who care for horses to ensure that Australian horses enjoy the best possible health and welfare. With an emphasis on providing the support members need to remain at the forefront of equine veterinary medicine, EVA also represents the interests of members to governments and equine industry groups. You must be a member of the AVA to join, and you can add EVA to your membership online.

You can contact EVA on 02 9431 5080 or at jeffrey.wilkinson@ava.com.au. For more information, or to become a member of EVA, visit www.ava.com.au/about-us/ava-groups/equine/

About the Bain Fallon Memorial Lectures

The Bain Fallon Memorial Lectures continues to be the biggest week of equine veterinary continuing education in the Southern Hemisphere, attracting over 200 delegates in 2019. The event features an industry exhibition comprising of over 50 exhibitors. It continues to be a sell-out trade show year-upon year, in addition to offering popular practical workshops. The vibrant social events are a highlight of the conference, and provide perfect networking opportunities with peers, suppliers and fellow industry professionals. At Bain Fallon in 2022 we will showcase the very best of Australia's equine veterinary researchers and scientists with a program befitting our proud 50-year history.

Follow EVA and Bain Fallon on social media!

What's new at Bain Fallon in 2022?

- **Bain Fallon returns to Melbourne in 2022!**
- **Music and entertainment on the exhibition floor**
- **Nerve Block Wetlab/workshop - more details on page 12**
- **The EVA Young Members Accommodation Offer has been expanded and will include a larger number of discounted accommodation for current EVA Young Members. Register for the conference and follow the steps below to secure a special discounted offer! See further details on page 7**

Prof. Hutchins News Hour

Tuesday 19 July | 9.00am-10.00am

Professor David Hutchins OAM (1926-2019) was an equine veterinarian of renown. The 'Prof' gained his veterinary degree in 1947 and his enquiring mind, extraordinary skill and determined drive sustained a veterinary career spanning more than 60 years. He achieved and sustained the highest level of national and international professional recognition for the quality, originality and impact of his clinical acumen. Not only was "Prof" a gifted clinician, innovator and leader, he was a mentor to many generations of veterinarians and remains an inspiration. Here we honour Prof Hutchins with the inaugural Prof Hutchins News Hour to highlight global developments in equine veterinary science.

Get involved – submit a clinical poster!

Clinical Abstracts Monday 18 July, 12.45pm – 5.30pm.

Clinical abstracts to be presented onsite at Bain Fallon, at the combined ANZCVS/EVA session on Monday 18 July 2022 are now being accepted. The abstracts can be recent research, clinical projects, or alternatively a case series or report involving any aspect of equine veterinary science. Submitted abstracts will be peer-reviewed by a panel appointed by both EVA and the equine chapter of the ANZCVS,

and if accepted, the author will be invited to present their abstract on Monday 18 July 2022 at Bain Fallon, at the Pullman Albert Park, Melbourne. A submission form should accompany every abstract; multiple abstracts can be submitted. Accepted abstracts will be printed in The Australian Equine Veterinarian and The Proceedings of the ANZCVS Science Week.

Clinical Posters Monday 18 July 2022, 5.30pm – 6.30pm

Submission Deadline: Monday 6 June 2022

Have you or a group of your colleagues considered presenting a poster at the Bain Fallon Memorial Lectures in July this year? Please consider the option of presenting a poster at Bain Fallon. The poster session is an excellent opportunity for you to gain recognition for your research or clinical work and to build your professional profile. In addition, there are a number of prestigious prizes available for posters, each with a cash component of \$500. Your poster may cover any topic in equine veterinary science.

Posters must be the original work of the veterinarian and can be research or clinical case reports or a case series. The poster should contain innovative information, or an advancement of knowledge for the equine veterinary profession. At least one of the authors of the poster must be present to meet with the judging panel at the poster judging session during lunch, on Monday 18 July 2022 at Bain Fallon, at the Pullman Albert Park, Melbourne.

Bain Fallon Venue & Accommodation

Pullman Melbourne Albert Park, 65 Queens Road, Melbourne 3004, Australia.

Centrally Located on Queens Road, the hotel overlooks the picturesque Albert Park Lake and is minutes from St Kilda Road, Chapel Street and St Kilda precinct. It is a short distance from Melbourne's central business district and attractions including Queen Victoria Market, Federation Square and Melbourne's sporting and arts precincts.

Accommodation Offers available for delegates:

Pullman 'Classic King' or 'Classic Twin' Room

\$225.00 per night, room only

Mercure Standard Room

\$155.00 per night, room only

Mercure Premium Room

\$175.00 per night, room only

EVA Young Members Accommodation Offer: 5 nights' accommodation for \$300!

In 2022 we continue our accommodation offer for EVA Young Members to attend Bain Fallon!

Stay at the Pullman Melbourne Albert Park for only \$300 for 5 nights!

Love this offer?! Show the EVA some love and post a favourite Bain Fallon related photo on social media and tag the EVA!

Instagram @equinevetaus #BainFallon

Facebook - www.facebook.com/equinevetsaustralia/

EVA Young Members who register for the full lecture and social package are eligible for the accommodation offer. Spaces are strictly limited and allocated on a first come first serve basis.

Spaces are strictly limited and on a first come first serve basis. The booking and \$300 full payment must be made with conference registration. EVA and organisers will secure the room on your behalf. Rooms are 3 guests per room: twin room plus rollaway. Rooms will be female only and male only unless notified otherwise. Room only booking (breakfast and incidentals are not included) from Sunday 17 – Friday 22 July 2022. This offer is available for current EVA Young Members who register for the full Bain Fallon Lecture and Social package.

EVA Young Members Scholarships - kindly sponsored by Interpath

The Bain Fallon Young Member Scholarships provide an opportunity for four EVA Young Members to attend our flagship event for free, giving them the chance to continue their education and broaden their networking opportunities amongst their peers.

Kindly sponsored by Interpath, the scholarship is open to current financial EVA Young Members who can demonstrate outstanding ability and commitment to their profession and the equine veterinary profession.

Selection criteria

All applications should be able to demonstrate:

- An involvement in and commitment to equine veterinary medicine
- An interest in pursuing educational opportunities relevant to equine veterinary work; and
- An intention to further develop and continue career opportunities in the equine veterinary profession.
- Applications from graduate veterinarians in equine practice will be highly regarded.

The scholarship prize includes complimentary registration to the Bain Fallon Memorial Lectures in 2022 and shared accommodation (check in Sunday 17 July, check out Friday 22 July to be organised by EVA).

The Scholars for 2022 have already been selected. The Scholarship Program will be repeated at Bain Fallon in 2023.

Bain Fallon Equine Veterinary Nursing Conference

Thursday 21 July 2022

Pullman Melbourne Albert Park,

This year marks the return of EVA's Equine Nurses Conference – a continuing education event catering to equine veterinary nurses. Held over one full day at Pullman Melbourne Albert Park, the program has been developed with experienced veterinarians and specialist equine nurses showcasing in-depth, practical and interactive professional development. The lectures will focus on a range of topics including workplace mental health, ophthalmology, cardiology, pathology and dentals.

Nurses are invited to the Bain Fallon trade show during breacktimes and then to the Bain Fallon Gala Dinner on Thursday 21 July.

This conference is an educational opportunity for all equine nurses, whether they work in dedicated equine hospitals, ambulatory practice, studs or mixed practice. Connect with nursing colleagues and veterinarians, visit the trade exhibition and enjoy a dedicated Nurses Dinner on the Wednesday evening.

Thursday 21 July 2022	
8:30am – 9:30am	Legal issues for Equine nurses and how to help your vet not get sued <i>Nick Kannegieter</i>
9:30am – 10:15am	Psychological First aid and resilience in the veterinary industry: presentation <i>Louisa Johnson & Angela Gent, Barringtons Consultants</i>
10.15am – 10.45am	Morning tea – Bain Fallon Exhibition Area
10.45–11.30 am	Psychological first aid and resilience in the veterinary industry: workshop- <i>Louisa Johnson & Angela Gent, Barringtons Consultants</i>
11:30am – 12.30pm	Ophthalmology for the equine nurse <i>Andrew Turner</i>
12:30pm – 1:30pm	Lunch - Bain Fallon Exhibition Area
1:30pm – 2:30pm	Cardiology- abnormalities and what they mean <i>Laura Nath</i>
2:30pm – 3:30pm	Importance of Equine Dentistry and common dental conditions <i>Paul Owens</i>
3:30pm – 4:00pm	Afternoon tea - Bain Fallon Exhibition Area
4.00pm – 5.00pm	Clinical Pathology <i>Catherine Chicken / Anna Blishen</i>
7.00pm – late	Bain Fallon Memorial Lectures Gala Dinner - Grand Ballroom

Full Conference Package \$595

Includes:

- Full access to Nurses Conference scientific sessions
- Morning tea, lunch and afternoon tea
- Access to the Bain Fallon Memorial Lectures exhibition
- 1 x ticket to the Bain Fallon Gala Dinner (the evening of Thursday 21 July)

Conference Package without Gala Dinner Ticket \$495

- Full access to Nurses Conference scientific sessions
- Morning tea, lunch and afternoon tea
- Access to the Bain Fallon Memorial Lectures exhibition

Nerve Block Wetlab

Presented by the University of Melbourne

Convened by
Dr Hadley Willsallen BVSc,
MANZCVSc, DACVS-LA

Registered Specialist in Equine
Surgery, this excellent wetlab
will be presented by a range
of specialist demonstrators.

Sunday 17 July, 9.00am - 4.30pm
University of Melbourne, Parkville Campus
Equipment provided

Lecture:

- Equine nerve block and joint injection technique descriptions, interpretation, misinterpretation, and what can go wrong?
- Perineural and joint injections of the fore and hindlimbs
- Now I can put a needle in it, what medication should I use?
- Diagnosis of wound communication with synovial structures and/or septic synovial cavities and how to manage in the field with lavage techniques and local antimicrobials

Wetlab:

Attendees will refresh and review perineural and intrasynovial diagnostic anaesthesia of the limb including considerations when deciding on what technique and local anaesthetic agent or intra-articular medication to use.

The wetlab will be very hands-on, working in pairs with a cadaver fore and hindlimb. There will be a high ratio of circulating specialists to allow plenty of opportunity to practice and master the injections and review anatomy. Synovial communication with wounds, identifying septic joints and lavage techniques in the field will be practiced. Collaborative and open discussions between instructors and attendees on clinical experiences and preferences will be encouraged.

Cost

EVA Members: \$995

AVA Members: \$1,345

Non-Members: \$2,295

Price includes GST

Morning tea, lunch and afternoon tea included

Places are limited

Sunday 17 July	
9.00am - 4.30pm	Nerve Block Wetlab
5.00pm - 7.00pm	Registration opens
6.00pm - 7.30pm	Exhibition Opening & Welcome Drinks
Monday 18 July	
7.00am - 8.00am	Breakfast session
8.00am - 9.00am	Conditions of the Soft Palate Brian Anderson
9.00 - 10.00am	Annual General Meeting
10.00am - 10.45am	Morning Tea - Exhibition Hall
10.45am - 11.45am	Things I have learnt along the way - management of twins Angus McKinnon
11.45am - 12.45pm	Lunch - Exhibition Hall
12.45pm - 2.45pm	EVA & ANZCVS Clinical Papers & Abstract Presentations
2.45pm - 3.25pm	Afternoon Tea - Exhibition Hall
3.25pm - 5.30pm	EVA & ANZCVS Clinical Papers & Abstract Presentations
5.30pm - 6.30pm	Clinical Posters Presentations & Happy Hour
6.30 - 8.30pm	Vets & Industry "Connect" Night Exhibition Hall

10.00am - 10.45am	Morning Tea - Exhibition Hall		
10.45am - 11.45am	The challenges, opportunities and data for the TB racing and breeding industries <i>Meredith Flash</i>		
11.45am -12.45pm	Clinical applications of assisted reproductive techniques in the mare <i>Chelsie Burden</i>		
12.45pm - 1.45pm	Lunch - Exhibition Hall		
1.45pm - 2.45pm	Conditions of the Arytenoid Cartilage <i>Brian Anderson</i>		
2.45pm - 3.25pm	Afternoon Tea		
3.25pm - 4.25pm	Trends in pathogens causing placentitis and speciifc treatment strategies <i>Joan Carrick</i>		
4.30pm - 5.30pm	Things I have learnt along the way- useful tips and tricks I use in equine practice <i>Angus McKinnon</i>		
7.00pm - 7.30pm	Pre Gala dinner drinks		
7.30pm - Late	50 Years of EVA Gala Dinner Grand Ballroom		Kindly sponsored by 

Keynote speakers

Albert Sole Guitart

After graduation from the Autonomous University of Barcelona in 2007, Albert did an internship at the University of Guelph, Canada followed by a private practice internship at Rood and Riddle Equine Hospital in Kentucky. Albert moved to the University of California, Davis for his surgical training where he stayed and worked as an Equine Surgical Specialist for a further two years. After that, Albert moved to Australia in 2014 and worked at Camden Equine Centre, University of Sydney for almost 3 years before joining the University of Queensland. Albert is a specialist in equine surgery, and he became board certified by the American College of Veterinary Surgeons in February 2013.

Alex Young

Alex is a Diplomate of the American College of Veterinary Radiology and registered specialist in Veterinary Diagnostic Imaging having trained for 6 years at the University of California, Davis. She completed a rigorous 2 year fellowship in Large Animal Ultrasound during this time and although she is trained as a veterinary radiologist for all species, Alex's primary interest remains equine musculoskeletal imaging. Alex currently works part time as a Senior Lecturer in Veterinary Diagnostic Imaging at the University of Queensland and part time as a private consultant equine teleradiologist. She thoroughly enjoys training veterinary students and practitioners in various imaging techniques as well as the value of a multi-modality approach to the more challenging clinical cases.

Andres Diaz Mendez

Andrés is a lecturer at The University of Melbourne who earned his veterinary degree from the Universidad de La Salle in Bogotá, Colombia. After moving to Canada in 1999, he pursued his postgraduate education at the Ontario Veterinary College, University of Guelph, where he earned his MSc in clinical studies in 2006 working on equine respiratory viruses and a PhD in veterinary virology in 2012 focused on the picornavirus equine rhinitis A virus. Andrés then continued as a postdoctoral fellow at the Firestone Equine Respiratory Research Laboratory at the University of Guelph until his relocation to Melbourne in 2014.

Angus McKinnon

Angus graduated from Melbourne University Veterinary School.

After a short time in a mixed rural practice, he received an offer of a residency at the Ontario Veterinary College. As he was a slow learner, he was there for 5 years. That was followed by another 5 years at Colorado State University where he was fortunate enough to learn from the “the big three” in Equine Reproduction of Squires, Voss and Pickett.

After returning to Australia, he established the Goulburn Valley Equine Hospital with Jim Vasey. Recently the Hospital was sold to Melbourne University as part of their teaching program for students.

Having the students present all the time and being responsible for their practical training has been a rewarding experience for all of the staff at GVEH.

Along the way he has learnt and forgot quite a few things. He has written many journal articles and published a few books on equine reproduction and ultrasonography.

He never expected to be invited to speak again at Bain Fallon, not just because of bad behaviour but due to the frequency of previous invitations.

He feels it is a nice gesture to be invited again on the eve of what probably heralds his movement into full time farming and thus he has titled his talks “things I have learnt along the way”.

Brian Anderson

- BVSc with distinction 1986 (Massey University, New Zealand), MVSc in Equine Pharmacology and internship in equine medicine and surgery 1989-1991 (Massey University New Zealand).
- Resident in Large Animal Surgery and MS degree 1991-1994 (University of Minnesota USA).
- Diplomate American College of Veterinary Surgeons 1996 in Large Animal Surgery.
- Lecturer and Senior Lecturer in Surgery 1994-2000 Massey University.
- Brian joined the Ballarat Veterinary Practice in September 2000 and became a partner in 2003.
- Specialist in Equine Surgery Victoria, Australia since 2009.

Brian has many years of experience in upper respiratory tract surgery of the horse. He co-authored the chapter on the Larynx in Auer and Stick: Equine Surgery 4th edition. He was the endoscopic consultant for New Zealand Bloodstock Ltd 1996-2000 and has researched, published and lectured on diseases and conditions of the upper respiratory tract nationally and internationally.

Chelsie Burden

Dr Burden graduated from Kansas State University College of Veterinary Medicine in 2011. She subsequently completed an internship at Oklahoma City Equine Clinic followed by a residency and master's degree at the Colorado State University Equine Reproduction laboratory. Dr. Burden became board-certified with the American College of Theriogenologists in 2015.

Dr Burden transitioned to Australia (Goulburn Valley Equine Hospital) following her residency. She continued transitioning between the southern and northern hemisphere breeding seasons working at Claiborne Farm in Kentucky, Haras Al Boraq in Morocco, and the University of Florida before settling in Australia in 2017. Dr Burden's interests focus on the problem broodmare and assisted reproductive technology in the mare.

Ed Annand

Ed has fourteen years equine practice experience including referral, first opinion, stud, and university-clinical-teaching in Australia (Qld, NSW, Vic) and UK. He holds post-graduate qualifications in Stud-Medicine/Reproduction, Equine Surgery and Veterinary Epidemiology. Since involvement in the first identification of Australian bat lyssavirus spillover to domestic mammalian species in 2013, he has led the 'Horses as Sentinels' research. The research hypothesised that some disease in horses consistent with HeV, but negative when tested, is due to infection with novel viruses that may similarly spill-over from flying-foxes posing potential zoonotic risk. This research recently identified a hitherto unrecognised, equally-pathogenic HeV variant.

James Gilkerson

James Gilkerson is an internationally recognised expert in veterinary virology and microbiology. Professor Gilkerson is a graduate of the University of Sydney and has been a faculty member at the Melbourne Veterinary School since 2002. Professor Gilkerson's research is predominantly in the area of host-pathogen interaction and the epidemiology of infectious disease, with a focus on equine infectious diseases. In recent years this research has included the use of big data to describe antimicrobial use in veterinary practice and antimicrobial stewardship in the veterinary sector. James is an EVA past-President and is a Fellow of the Australian Veterinary Association.

Joan Carrick

Joan is Diplomate of the American College of Veterinary Internal Medicine (Large Animal) and a registered specialist in Equine Medicine with a special interest in prevention of equine pregnancy loss. Joan graduated from the University of Queensland's Veterinary School in 1981. Post graduate training includes first-class honours in Equine Medicine, a residency in Large Animal Medicine and a MVSc. at the WCVN, University Saskatchewan, Canada, a PhD from University of Georgia, and a critical care fellowship at University of Tennessee Medical School. Joan is currently a specialist consultant who manages high risk pregnant mares and investigates equine pregnancy loss.

Josh Slater

Josh Slater is Professor of Veterinary Medicine at the Melbourne Veterinary School where is Head of Department of Veterinary Clinical Sciences. He is a past president of the British Equine Veterinary Association, the European College of Equine Internal Medicine and the Federation of European Equine Veterinary Associations and was secretary to the European Board of Veterinary Specialisation. He was biosecurity advisor for the 2008 and 2012 Equestrian Olympic Games, and the 2014 and 2018 World Equestrian Games. He is a co-director of the British Animal Rescue Trauma Association and is chairman of the Horse Trust in the UK.

Kirsten Bailey

Kirsten completed her veterinary degree at the University of Queensland in 2000 and worked in mixed practices in Victoria and the United Kingdom before completing an equine internship at the University of Melbourne. Following her internship, Kirsten worked in equine practice in Victoria and became a member of the Australian and New Zealand College of Veterinary Scientists in equine medicine. After 10 years in practice, Kirsten undertook a PhD at the University of Melbourne, investigating infectious causes of diarrhoea in Australian foals. Now, as a research fellow, Kirsten investigates patterns of antibiotic use and explores strategies to improve antimicrobial stewardship in veterinary practice.

Kirsten Neil

Dr Kirsten Neil graduated from the University of Melbourne in 1996. After 3 years in private practice, Kirsten completed an internship in the Scone Veterinary Hospital's neonatal intensive care unit followed by a residency in equine medicine at Michigan State University in 2004, where she completed a Masters degree in equine osteoarthritis. Kirsten is a Diplomate of the American College of Veterinary Internal Medicine and a registered specialist in equine medicine. Kirsten has a special interest in musculoskeletal ultrasonography and became a certified member of the International Society of Equine Locomotor Pathology (ISELP) in 2012. Kirsten became a diplomate of the American College of Veterinary Sports Medicine and Rehabilitation in 2013. Kirsten is currently the FEI National Head Veterinarian for Australia, was a member of the veterinary commission for the 2016 Rio Olympic Games and is the vice chair of the FEI Veterinary Committee.

Kristopher Hughes

Kris graduated from the University of Sydney in 1995 and undertook an equine medicine residency there between 1999 and 2004. He subsequently worked at the University of Glasgow, before returning to Australia in 2009. He is currently a professor of equine medicine and clinical director at Charles Sturt University. His research interests include disorders of the lower airways, gastrointestinal disease, equine cardiology, equine neurology and intensive care of horses. He is a Fellow of the Australian College of Veterinary Scientists, a diplomate of the European College of Equine Internal Medicine and a proud supporter of the Collingwood football team.

Laura Nath

Laura Nath is a registered specialist in Equine Medicine with a consulting practice based in Melbourne. She has worked in both first opinion and referral practice in Australia and the UK. Laura completed a residency at the University of Melbourne and attained a fellowship of the ANZCVS in 2010. She also has a certificate in equine medicine from the Royal Veterinary College in the UK and a masters in Veterinary medicine investigating the role of cardiac troponin in heart disease in horses. Laura is currently undertaking a PhD through the University of Adelaide investigating exercise associated cardiac arrhythmias in Thoroughbred racehorses.

Leanne Begg

Leanne graduated from UQ in 1987. She completed an internship at the University of Sydney in 1988. She worked at Randwick Equine Centre (REC) from 1989 to 1991 and completed a residency in Equine Medicine at MSU from 1991 to 1994. In 1994 she received a Masters and became a Member of the ANZCVS in Equine Medicine. In 1995, Leanne became a Diplomate of the ACVIM and was registered as a Specialist in Equine Medicine. She has been Gai Waterhouse's stable veterinarian for the last 19 years and consults on medical cases at the REC Specialist Equine Centre.

Massimo Delli-Rocili

Massimo graduated in 2014 from Cientifica del Sur in Lima, Peru, with a Doctor of Veterinary Medicine. He completed a 1 year equine internship in Chino, California. He then moved to NZ, and did an equine internship at Massey University and afterwards worked as an equine field vet there for 6 months. Then he completed a large animal surgical residency and obtained a Doctorate of Veterinary Science (DVSc) from the Ontario Veterinary College in Canada in 2020, and then became a member of the American College of Veterinary Surgeons (ACVS) in early 2021 allowing him to become a registered specialist in equine surgery in North America.

Meredith Flash

After graduating from the University of Melbourne (2006), Meredith Flash worked in equine racing and performance practice. She developed an interest in where horses went after retiring from racing through her work. This has shaped her research focus as the lead researcher for The Australian Thoroughbred Wellbeing Project, which investigates barriers to entering training and drivers of retirement for Thoroughbreds in Australia.

Natali Krekeler

Natali completed her veterinary medicine degree and a Doctorate degree in equine clinical research at the Free University of Berlin. In 2002 Natali began a residency in the Section of Theriogenology at Cornell University, USA. She passed the board exam of the American College of Theriogenologists and remained at Cornell as a Clinical Instructor in Theriogenology and Postdoctoral Associate in Developmental Biology until 2006. In 2011 Natali completed her PhD degree at The University of Melbourne, where she is since employed,

David Johnson BVSC MRCVS FAVA

David has been working in mixed practice since graduating from Sydney University over 40 years ago. He has worked in Western NSW, England and then moved to Coffs Harbour in 1984 where he is a partner in a 16-vet practice. David was on the EVA committee for 14 years, a past president, policy councillor and board member of the AVA. He has been heavily involved with equestrian sports particularly eventing and has been to three Olympic games. David was on the Australian Olympic team in London as the show jumping team vet.

Ultrasound for Vets

3 products to enhance
your equine
consults

Versana Active™

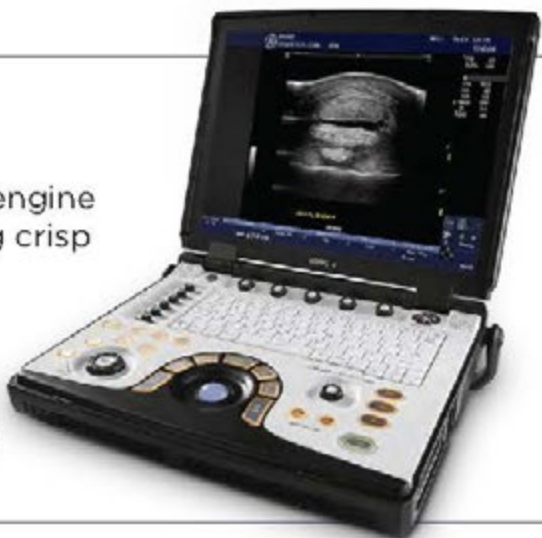

The Versana Active™ ultrasound system delivers the imaging capability of a console in a hand-carried, lightweight package that enables you to actively take your system to your patients, on premises or to remote facilities. Adaptable to cover a broad range of everyday exams.

Flexible • Mobile • Great Value

LOGIQ e NextGen

See clearly. See quickly. Guide precisely. Its imaging engine comes from GE's flagship console systems, delivering crisp images in a compact package.

Simple • Fast • Precise

LOGIQ™ P9

The LOGIQ™ P9 is easy to use and enables fast exams through customisable user workflow and productivity tools.

Personalised • Patient-centric • Practical ultrasound system

the joint health experts

4CYTE™
horse

EPIITALIS®
FORTE

4CYTE™, containing **EPIITALIS®**, is scientifically developed to address the clinical signs of joint health and modify the process by reversing or repairing the pathological process that occurs in diseased joints.

4CYTE™ Granules for Horses containing **EPIITALIS®** and a full complement of marine derived actives.

4CYTE EPIITALIS® FORTE for Horses is a gel formulation for joint and cartilage matrix support in horses.

EPIITALIS® is patented to:

- Proliferate chondrocyte cells which actively 'tips the balance' back in favour of the production of healthy cartilage instead of degeneration
- Suppress the inflammatory chemicals responsible for poor joint function and inflammation

We have been using 4CYTE™ for over two years now. Initially, I only used it on those that were older and had a few problems that needed managing. But with the introduction of the new 4CYTE™ EPIITALIS® FORTE for Horses, we have placed all our horses onto it including the youngsters.

One of our horses required medication of his hocks, fetlocks and digital sheath twice a year to remain competition fit. We started him on 4CYTE™ two years ago and he has not looked back. I think the non-invasive, daily administration is one of the main advantages of this product.

While the injectable products are good, they do not provide the same daily support of 4CYTE™ Granules for Horses and EPIITALIS® FORTE. I like my horses' joints to be supported both while they are training as well as when competing.

We also use 4CYTE™ in our rehabilitation business and have all our post-surgical patients on it, especially those that have undergone arthroscopy. We have seen a marked increase in positive outcomes post-surgery, and a reduction in total rehabilitation time.

Erin Roddy, Veterinarian
Spring Creek Rehabilitation and Camden Equine Centre
