

Vehicle and site visit checklist

For low risk site visits, veterinary personnel should routinely protect themselves with clean overalls and boots, and disinfect on entering and leaving premises.

Veterinary vehicles used for site visits should carry all the following supplies for use in both high and low risk activities.

- Clean outerwear such as overalls, hat and washable boots
- Box of surgical gloves
- Surgical mask
- P2 respirator
- Soap and water for washing hands and boots
- Alcohol-based hand rub
- General purpose disinfectant (e.g. Virkon[®])
- Sharps container
- High risk site visit checklist
