Mastitis in the modern Australian dairy cow
This comprehensive study offers insight into Mastitis Pathogens in the South Eastern Australian Dairy industry

Program

- Survey objectives, samples and design
- Most common mastitis pathogens in Australia
- Mastitis by region
- Timing of mastitis infection
- Antibiotic sensitivity of the major mastitis pathogens
- Launch of mastitis e-event kits

Presenters

Dr Neil Charman, BVSc (Hons), MVS, MBA - Strategic Technical Manager, Zoetis
Neil Charman has worked as a dairy veterinarian for most of his career and he completed his Masters in Dairy Medicine in 1995 and his MBA in 2006. He has been working for Pfizer (now Zoetis) in the area of clinical development since 2007 where his clinical research has been strongly focussed on positive outcomes for dairy cattle and the dairy industry.

Dr Rod Dyson BVSc (Hons) - Dairy Focus
Rod Dyson has been in dairy practice for his entire career, including nearly 30 years as a partner at Kyabram Veterinary Clinic in the Goulburn Valley and 4 years as Project Leader for Countdown Downunder. He now runs Dairy Focus, a consultancy practice working almost entirely in mastitis control, both directly on farm and in the industry, and maintains a keen interest in developing innovative ways to create change on farms.
